

## A YOUTHFUL GLOW WITH ULTHERAPY AT TRIFECTA MED SPA

BY SIENA DAVENPORT

If you're looking to turn back the hands of time and achieve youthful, flawless skin, look no further than the magnificent Trifecta Med Spa. The spa offers state-of-the-art treatments and technology provided by the best licensed estheticians, which results in perfect, glowing skin for all.

While the spa offers a wide range of aesthetic services, including the popular Botox and Juvéderm treatments, Trifecta is one of the leaders in providing Ultherapy, a new type of non-surgical, non-invasive face lift. The award-winning treatment penetrates to the deep layers of skin tissue without disturbing surface tissue. The result is a natural improvement in the appearance of fine lines and wrinkles while maintaining a youthful glow. Trifecta's team of professionals have extensive experience with Ultherapy, and are committed to helping their clients achieve a fresher, more youthful look. During a free consultation at the spa, the friendly staff will answer questions and will customize a treatment plan.

While most of us want to look as good as possible as we get older, the prospect of having cosmetic surgery can be daunting. Ultherapy first received FDA approval in 2009 and is the only non-invasive procedure approved in the United States to lift skin on the brow, chin, neck, and décolletage.

How does it work? Using the latest in technology, ultrasound energy bypasses the skin's surface to target deep structural tissue, creating heat that stimulates the production of firming collagen. This is important because collagen is a protein responsible for the skin's elasticity and firmness. The result is a tightening and steady lifting, or shifting of your skin back into a more youthful condition and form-pleasing shape.

Ultherapy takes about 60 to 90 minutes. You may notice an

immediate improvement, but the natural course of generating new, more elastic collagen forms over two to three months, with continued improvement for up to six months, and results are permanent.

The procedure can be uncomfortable but most clients say it is very tolerable. The discomfort is only during the treatment and there is no discomfort or down-time afterward.

Ultherapy is used with clients from 30 to 70 years old and it is a favorite of many celebrities, including Kim Kardashian, Courtney Cox, and Jennifer Aniston, who use it to maintain their gorgeous skin.

Trifecta Med Spa has three elegant locations. Their newest spa Trifecta 57 opened in Midtown this year. It is located conveniently right across from Carnegie Hall on 57th Street and Seventh Avenue. They also have two more beautiful offices in the Financial District and Hewlett, Long Island.

In this day and age, there are countless products and treatments out there for women and men looking to drink from the fountain of youth. Ultherapy is the revolutionary treatment we have all been waiting for. It is quickly becoming the go-to treatment before, or even in place of, surgical face-lifts. If you're looking to try Ultherapy, you can count on Trifecta Med Spa to create beautiful results.
